Paper: MM-024883.R1 "EGRA: Toward Enhanced Behavior Graphs and Representation Alignment for Multimodal Recommendation".

Dear Dr Zhiqi Shen,

I am writing to you concerning the above referenced manuscript, which you submitted to the IEEE Transactions on Multimedia.

Based on the enclosed set of reviews (**See note below about attachments), I have decided that the manuscript be ACCEPTED FOR PUBLICATION WITH MANDATORY MINOR REVISIONS INCLUDING ENGLISH USAGE (AQE).

When you are ready to submit your revision, visit the following link:
<https://ieeex.atyponrex.com/submission/submissionBoard/REX-PROD-2-89E4A0C2-A75E-45DF-8251-6A2F5860173A-91F15E69-F1D7-4F07-BA90-E0E44C0EA3B5-09193/current?doctype=external>

If you have any questions regarding the reviews, please contact me. Any other inquiries should be directed to Nanette Januszkiewicz.

Best regards,

Regards,

Professor Shiqi Wang

Reviewer Comments:

Reviewer: 2

Recommendation: A - Publish Unaltered

Comments:
 The authors have addressed my concerns well. I have no further comment.

Additional Questions:

1. Is the topic appropriate for publication in these transactions?: Excellent Match

1. Is the paper technically sound?: Yes

2. How would you rate the technical novelty of the paper?: Very Novel

Explain: Solid work and promising performance.

3. Is the contribution significant?: Significant

4. Is the coverage of the topic sufficiently comprehensive and balanced?: Yes

5. Rate the Bibliography: Satisfactory

1. How would you rate the overall organization of the paper?: Satisfactory

2. Are the title and abstract satisfactory?: Yes

3. Is the length of the paper appropriate? If not, recommend what should be added or eliminated.: Yes

4. Are symbols, terms, and concepts adequately defined?: Yes

5. How do you rate the English usage?: Satisfactory

If you are suggesting additional references they must be entered in the text box provided. All suggestions must include full bibliographic information plus a DOI.

If you are not suggesting any references, type N/A.: N/A

Recommendation: A - Publish Unaltered

Comments:

(There are no comments. Please check to see if comments were included as a file attachment with this e-mail or as an attachment in your Author Center.)

Additional Questions:

1. Is the topic appropriate for publication in these transactions?: Adequate Match

1. Is the paper technically sound?: Yes

2. How would you rate the technical novelty of the paper?: Novel Enough for Publication

Explain: The revised manuscript has solved most of my previous concerns. The presentation has been significantly improved to better convey the novelty of the proposed method.

3. Is the contribution significant?: Moderately Significant

4. Is the coverage of the topic sufficiently comprehensive and balanced?: Yes

5. Rate the Bibliography: Satisfactory

1. How would you rate the overall organization of the paper?: Satisfactory

2. Are the title and abstract satisfactory?: Yes

3. Is the length of the paper appropriate? If not, recommend what should be added or eliminated.: Yes

4. Are symbols, terms, and concepts adequately defined?: Yes

5. How do you rate the English usage?: Satisfactory

If you are suggesting additional references they must be entered in the text box provided. All suggestions must include full bibliographic information plus a DOI.

If you are not suggesting any references, type N/A.: n.a.

Reviewer: 4

Recommendation: AQ - Publish With Minor, Required Changes

Comments:

I think the manuscript can be considered for publication after minor revision. The authors are suggested to address the following issues.

1) The manuscript still contains several minor grammar and formatting issues. A careful proofreading is recommended to improve readability.

2) The long-tail analysis is interesting, but the discussion is still somewhat limited. The authors may add more explanation on why the proposed enhanced graph benefits tail items more significantly than head items.

3) Although some complexity analysis is provided, the authors should further discuss the

practical cost of this pretraining stage, especially for large-scale recommendation scenarios.

Additional Questions:

1. Is the topic appropriate for publication in these transactions?: Excellent Match

1. Is the paper technically sound?: Yes

2. How would you rate the technical novelty of the paper?: Novel Enough for Publication

Explain: The topic is relevant to multimedia recommendation, and the paper is generally well organized. The proposed method is evaluated on five benchmark datasets and shows consistent improvements over recent baselines, with ablation studies supporting the usefulness of the main components.

3. Is the contribution significant?: Moderately Significant

4. Is the coverage of the topic sufficiently comprehensive and balanced?: Yes

5. Rate the Bibliography: Satisfactory

1. How would you rate the overall organization of the paper?: Satisfactory

2. Are the title and abstract satisfactory?: Yes

3. Is the length of the paper appropriate? If not, recommend what should be added or eliminated.: Yes

4. Are symbols, terms, and concepts adequately defined?: Yes

5. How do you rate the English usage?: Satisfactory

If you are suggesting additional references they must be entered in the text box provided. All suggestions must include full bibliographic information plus a DOI.

If you are not suggesting any references, type N/A.: N/A
